

Magna Ready Plaster is a mix of high quality polymer additives and binders. This cement plaster is very strong and durable. It can be used on interior as well as exterior walls. It is easy to use and gives a fine finish to the wall surface. We can assure superior finish and longevity with Magna Plaster.

ADVANTAGES

Time Saving

No Shrinkage Cracks

Minimum Wastage

Premixed

Hassle Free

TECHNICAL SPECIFICATIONS

| PARAMETERS | SPECIFICATIONS |
|------------------------|---|
| Maximum Aggregate Size | 2.5mm Max |
| Bulk Density | 1.7-1.8 Kg/l |
| Silt Content in Sand | < 1% |
| Soundness | 0.05% |
| Storage | 6 months from the date of manufacturing |

| CHARECTERISTICS | VALUES |
|----------------------|---------------------------------|
| Coverage | 0.23 - 0.30 kg/mm/sq.ft. |
| Compressive Strength | More than 8 Mpa in 28 days |
| Curing | 5 - 7 days |
| Pot life | 1 - 2 hrs |
| Water Demand | Mix 9 - 11 litres for 50 kg Bag |
| Appearance | Greyish powder |
